

Companies Act 2006 compliant Blueprint v9.0a launching first week of September

ICSA Software International is pleased to announce that v9.0a of Blueprint and CoAct for Windows will be launched during the first week of September. Fully compliant with the Companies Act 2006, this product upgrade is essential to all users managing UK companies.

By launching the product upgrade during September, clients are able to become “au fait” with the new software, before the 1 October 2009 deadline, and can expect to be provided with:

- **New forms** – 58 new “automated” forms
- **New electronic filing** – a new innovative XML gateway filing system, no more email
- **New validations** – shares classes, SAIL addresses, corporate directors rules, service addresses, director’s occupation, former names
- **New minutes and resolutions** – to reflect the new form numbers and sections of the Act
- **New registers** – directors residential addresses and register of directors and secretaries
- **Transitional support** – 1985 Act forms produced for events prior to 1 October

In order to keep clients informed of the new product features and how we will be assisting them through this significant legislative change, **ICSA Software International is hosting a series of User Group meetings across the UK during September** and a number of **webinar sessions**. For more information about our events or to register, please visit www.icsasoftware.com/events. An online video recording is also available; please email joanne.johnson@icsasoftware.com to request access to the link.

Over the past two years, ICSA Software International, the software company of the Institute of Chartered Secretaries & Administrators (ICSA), has been the first software provider to release updates addressing provisions of the Companies Act with each major commencement order. This commitment to our users is why four more FTSE 100 companies moved to Blueprint in the last 12 months, meaning 75% of the FTSE 100 trust Blueprint.
